NBA 2K14 OR NBA LIVE 14 (5)

- NBA 2K14 on next-gen is, in fact, a totally different package than the one that released in October for PS3 and Xbox 360. Instead of the LeBron Path to Greatness and Crews, the next-gen version introduces several new modes (and a refreshingly simplified redesign of the menus). Notably, My Career has you create a player and take him through a everything from a pre-draft showcase to Draft Night to working your way up from benchwarmer to starter. NBA Live 14 is very bad and its funny that EA Sports owns 2K Sports. NBA Live use to be so good what happen. 2k14(left)....Live 14(right)

CALL OF DUTY: GHOSTS NATIVE 1080P ON PS4, UP SCALED ON XBOX ONE (6)

- Infinity Ward's Mark Rubin has confirmed that Call of Duty: Ghost will run natively at 1080p on PlayStation 4, and is up scaled to 1080p from 720p on Xbox One. "We optimized each console to hit 60 FPS and the game looks great on both," Rubin said. Truthfully, I don't care about the PS4 because I'm a XBOX kind of guy.

CALL OF DUTY: GHOSTS SALES AT OVER \$1 BILLION ON FIRST DAY, BEATS GTA V (7)

- Activision must be one happy place to be right now. After the COD: Ghosts launch party on Monday night the game was launched at 00:01. Since then it has sold in excess of \$1 billion worth of copies. The game is already ranked number one on Xbox Live and is the most pre-ordered title ever on US retailer GameStop. Activision, who is claiming the sales number, says over 15,000 shops opened at midnight on Monday to sell the game across the globe. I never would have thought that COD would beat GTA 5 this year but it did...most people saying this isn't true but is it really true? Leave a comment in the description and read the link when you get a chance...

TOPIC FUTURE....?

- I actually like this topic and I also like blogging in general because its gives you something to talk about and want to research about something that affects everyday life in a positive and or negative way.

YES OR NO

- I believe not yet, I wanted to know which console gets played on the most. Is it the XBOX 360 and PS3 but it probably won't be accurate because of the new consoles coming out.

WHO...? WHAT...?
HOW...?

- My topic affected people who care about gaming and what's coming out. How did this happen, by me picky the top games that had the most ratings and making them into a interesting blog that everyone will enjoy reading.

ORIGINAL THOUGHTS

- No, I thought it will affect pacifically people who actually like to play video games and people who are love technology. Mainly people who may do commentary about some of the games I blogged about.

NOT DIFFICULT...

- It wasn't as difficult as I thought it would be. I knew what games and what topics to discuss to engage the followers of my blog to read about.
